React Native “Forms”

- Data entry through “form”-like elements are facilitated in React Native
- TextInput component allows you to type text in your app
 - Attributes such as `secureTextEntry` for handling password fields
 - Event bindings like `onChangeText`, `onBlur`, `onChange`, `onFocus`, `onKeyPress` etc.
- Input from react-native-elements allows for icons to the left and right of the field

Other React Native “Form” Widgets

- Switch
- Slider
- Picker
- React Native Elements: Rating, Checkbox, Slider
- Many others like react-native-datepicker

Modals

- Modals are displayed over the current page
- Modals are opened and presented from another component
- Need to maintain state in the 'host' component about the visibility of the modal
